REVIEW: Variables

## Skill Examples

1. In $y=3 x-2, x$ is the independent variable and $y$ is the dependent variable.
2. In $C=2 \pi r, r$ is the independent variable and $C$ is the dependent variable.
3. In $A=\ell w, \ell$ and $w$ are the independent variables and $A$ is the dependent variable.

## Application Example

4. Your income $i$ is calculated from the total time $t$ worked. Identify the independent variable and the dependent variable.
$\because$ Total time $t$ is the independent variable and your income $i$ is the dependent variable.
