

Big Ideas Math® Game Closet

It's All About the Details

Materials:

- Geometry game cards
- Pencil
- Paper

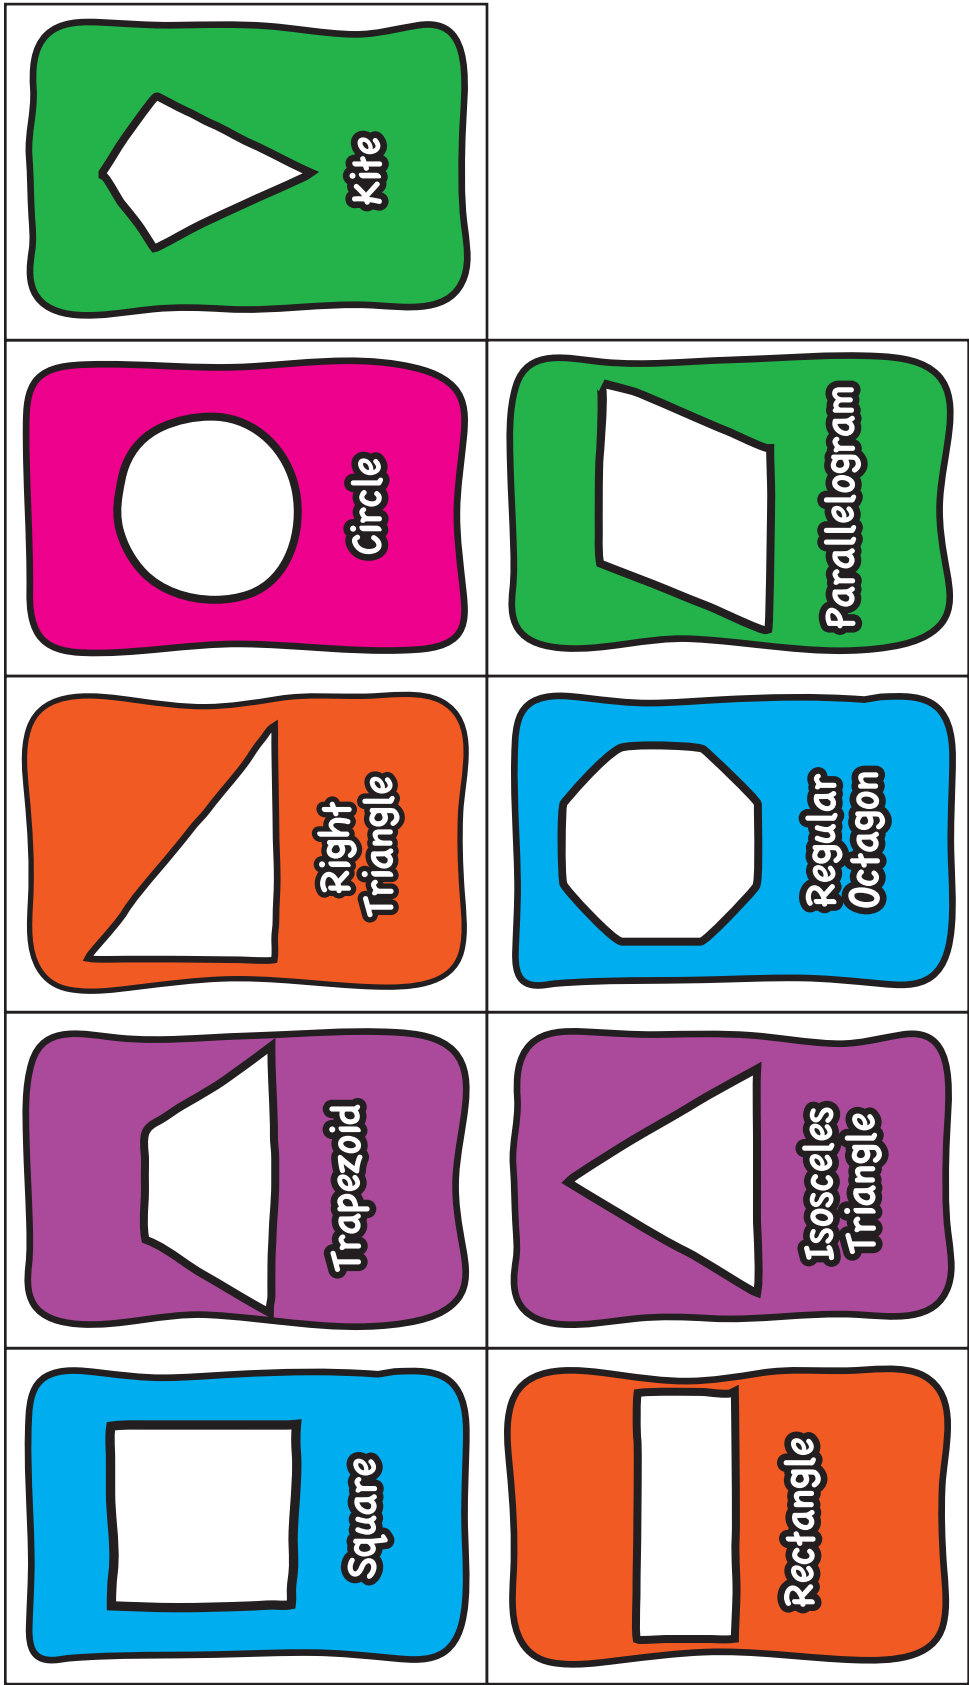

Directions:

Play in groups of two. Students shuffle the geometry cards and place them face down on the table. A student turns over one card. Both students write as many details as possible about the figure (right angles, equal sides, etc.).

Who Wins?

The student with the most correct details wins the round. Play continues until all cards are turned.

For more durable cards, cut cards into groups of four (2 on top, 2 on bottom) and glue onto index cards before cutting apart.
